### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claim 5 is the inclusion of an image forming condition satisfying at least 2 of the following – a high-density image forming condition where a density of a solid image is substantially saturated relative to the increase in contrast potential; an intermediate-density image forming condition where a density of hollow fine line or hollow discrete dots are substantially saturated relative to the increase in contrast potential; and a low-density image forming condition where a density of a fine line or discrete dots are substantially saturated relative to the increase in contrast potential. This is found in all of claim 5, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 6 and 7 is the inclusion of a liquid developer having a  $\gamma$ -saturation characteristic in which an adhesion amount of toner to the image carrier is substantially saturated relative to the increase in contrast potential. This is found in all of claims 6 and 7, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 9 is the inclusion of a method of step of forming a normal toner image under a determined image forming condition in which an adhesion amount of toner to the image carrier is substantially saturated relative to an increase in contrast potential. This is found in all of claim 9, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
